10. STABILITY AND REACTIVITY

5.	5. FIRE FIGHTING MEASURES	
	FLASH POINT: >200°F (Tag Close	SE CONTROL AND CONTROL
	EXTINGUISHING MEDIA:Foam, carbon dioxi	de (CO <sub>2</sub> ), dry chemical.
	SPECIAL FIRE FIGHTING PROCEDURES:	ed breathing apparatus and complete full-body persona xposed to extreme heat.
	FIRE AND EXPLOSION HAZARDS:	e may contain the original materials in addition to ion products may include, but are not limited to:
6.	6. ACCIDENTAL RELEASE MEASURES	
	SPILL OR LEAK PROCEDURES: Stop leak without ac sand) and collect in a suitable, closed container. Warm, soapy water or non-flammable, sa	dditional risk. Dike and absorb with inert material (e.g., ife solvent may be used to clean residual.
7.	7. HANDLING AND STORAGE	
	STORAGE TEMPERATURE (min./max.):	4000)
	STORAGE:	ace. Store in tightly sealed containers to prevent rade the resin.
	HANDLING PRECAUTIONS:	ct. Precautionary steps should be taken when curing
8.	EXPOSURE CONTROLS/PERSONAL PROTECTION	
	EYE PROTECTION GUIDELINES: Safety glasses with s	side shields or chemical splash googles
	SKIN PROTECTION GUIDELINES: Wear liquid-proof, ch butyl rubber or natural rubber) and full body-covering clothing.	
	RESPIRATORY/VENTILATION GUIDELINES:	n is usually adequate for most operations. Wear a apor in concentrations above applicable limits is likely.
	Note: West System, Inc. has conducted an air sampling study using this product or similarly components sampled for (epichlorohydrin, benzyl alcohol) were either so low that they were OSHA's permissible exposure levels.	formulated products. The results indicate that the not detected at all or they were significantly below
	ADDITIONAL PROTECTIVE MEASURES: Practice good caution contact. Avoid skin contact when removing gloves and other protective equipment. Wash the cleanly and following basic precautionary measures will greatly minimize the potential for ha conditions.	proughly after handling. Generally speaking working
	OCCUPATIONAL EXPOSURE LIMITS:	oduct as whole. Refer to OSHA's Permissible
).	PHYSICAL AND CHEMICAL PROPERTIES

STABILITY:	Stable.
HAZARDOUS POLYMERIZATION: an aliphatic amine will cause irreversible polymerization with	
INCOMPATIBILITIES:	Strong acids, bases, amines and mercaptans can cause polymerization.
DECOMPOSITION PRODUCTS:uncontrolled exothermic reactions or when otherwise heate	
TOXICOLOGICAL INFORMATION	
No specific oral, inhalation or dermal toxicology data is known epoxy resin present in this product is indicated below:	wn for this product. Specific toxicology information for a bisphenol-A based
$ \begin{array}{llllllllllllllllllllllllllllllllllll$	
TERATOLOGY:effects on the fetus when pregnant rabbits were exposed by exposed orally.	Diglycidyl ether bisphenol-A (DGEBPA) did not cause birth defects or other advers y skin contact, the most likely route of exposure, or when pregnant rats or rabbits were
REPRODUCTIVE EFFECTS:	DGEBPA, in animal studies, has been shown not to interfere with reproduction.
MUTAGENICITY:tests were negative in some cases and positive in others.	DGEBPA in animal mutagenicity studies were negative. In vitro mutagenicity

No ingredient of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA,

Ethylbenzene, present in this product < 0.1%, is not identified by OSHA or NTP as a carcinogen, but is identified by NTP as a Group 2B substance possibly carcinogenic to humans.

Many studies have been conducted to assess the potential carcinogenicity of diglycidyl ether of bisphenol-A. Although some weak evidence of carcinogenicity has been reported in animals, when all of the data are considered, the weight of evidence does not show that DGEBPA is carcinogenic. Indeed, the most recent review of the available data by the International Agency for Research on Cancer (IARC) has concluded that DGEBPA is not classified as a carcinogen.

Epichlorohydrin, an impurity in this product (<5 ppm) has been reported to produce cancer in laboratory animals and to produce mutagenic changes in bacteria and cultured human cells. It has been established by the International Agency for Research on Cancer (IARC) as a probable human carcinogen (Group 2A) based on the following conclusions: human evidence – inadequate; animal evidence – sufficient. It has been classified as an anticipated human carcinogen by the National Toxicology Program (NTP). Note: It is unlikely that normal use of this product would result in measurable exposure concentrations to this substance.

## 12. ECOLOGICAL INFORMATION

CARCINOGENICITY:

Prevent entry into sewers and natural waters. May cause localized fish kill.

Movement and Partitioning:

Bioconcentration potential is moderate (BCF between 100 and 3000 or Log Kow between 3 and 5).

NTP Product not listed.

IARC Product not listed.

OSHA Product not listed.

Degradation and Transformation:

Theoretical oxygen demand is calculated to be 2.35 p/p. 20-day biochemical oxygen demand is <2.5%.

Ecotoxicology:

Material is moderately toxic to aquatic organisms on an acute basis. LC50/EC50 between 1 and 10 mg/L in most sensitive species.

# 13. DISPOSAL CONSIDERATIONS

WASTE DISPOSAL METHOD: Evaluation of this product using RCRA criteria shows that it is not a hazardous waste, either by listing or characteristics, in its purchased form. It is the responsibility of the user to determine proper disposal methods

Incinerate, recycle (fuel blending) or reclaim may be preferred methods when conducted in accordance with federal, state and local regulations.
