EMERGENCY OVERVIEW

Danger! Strong oxidizer. Contact with other material may cause a fire. Harmful if swallowed. Eye contact may result in permanent eye damage. Causes eye, skin, and respiratory tract irritation. Target Organs: Blood, respiratory system, eyes, skin.

Potential Health Effects

Eye:

Causes eye irritation. Risk of serious damage to eyes.

Skin:

Causes skin irritation. May be harmful if absorbed through the skin.

Ingestion:

Harmful if swallowed. May cause irritation of the digestive tract. Ingestion of nitrate containing compounds can

lead to methemoglobinemia.

Inhalation: Causes respiratory tract irritation. May be harmful if inhaled. Inhalation of high concentrations of ammonia vapors may cause shortness of breath, bronchospasm, chest pain and pulmonary edema which may be fatal.

May cause methemoglobinemia, which is characterized by chocolate-brown colored blood, headache,

Chronic:

weakness, dizziness, breath shortness, cyanosis (bluish skin due to deficient oxygenation of blood), rapid heart rate, unconsciousness and possible death.

Section 4 - First Aid Measures

Eyes:

Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical aid immediately.

Skin:

Get medical aid immediately. Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes.
